## AMENDMENTS TO THE SPECIFICATION

1.      Please replace the paragraph located on page 3, lines 3-7, of the specification with the following Replacement Paragraph:

The processing unit 110 further controls a video mixing unit ~~112~~ 114 to overlay a frame boundary onto the video stream of the selected camera 105, wherein the frame boundary corresponds to the actually displayed frame of the graphical representation of the sensor network 103.

2.      Please replace the paragraph located on page 6, lines 19-31, of the specification with the following Replacement Paragraph:

This computer readable media may comprise, for example ~~RAM~~ random access memory (RAM) contained within the system. Alternatively, the instructions may be contained in another computer readable media (e.g. an image-processing module) and directly or indirectly accessed by the computer system. Whether contained in the computer system or elsewhere, the instructions may be stored on a variety of machine readable storage media, such as Direct Access Storage Device (DASD) (e.g., a conventional "hard drive" or a ~~RAID~~ redundant array of independent disks (RAID) electronic non-volatile memory, an optical storage device (for example, ~~CD ROM~~ Compact Disc read-only-memory (CD ROM), ~~WORM~~ write once, read many (WORM) disc, ~~DVD~~ digital versatile disc (DVD),), or other suitable computer readable media including transmission media such as digital, analog, and wireless communication links
